VSP Lab Routing & Unity Alignment

Unity Via progressive and TechShield AR designs are internal VSP Optics products that receive automatic tier clearance across contract laboratories. External branded designs (Varilux, Crizal, Shamir, Zeiss) must be processed through accredited partner facilities.

Patient Copay Calculation Rule

Copay brackets indicate the maximum allowable patient charge under commercial standard plans. Charge the patient the listed copay or 80% of Usual & Customary (U&C) retail, whichever is lower. Custom employer plan riders take precedence.
